LIGHT YEARS AHEAD

“The Enforcer” by Adjust-A-Wings Reflectors

• Advanced technology at an affordable price.

• Adjust-A-Wings are the “reflectors of choice” for many of the world’s top growers.

• The adjustable light spread allows growers to create ideal lighting conditions across ALL stages of growth.

• Patented reflector design increases area and intensity under each lamp.

How “The Enforcer” solves 4 important grower concerns.

“The Enforcer” is an adjustable double parabolic reflector that was designed to achieve maximum light distribution during all stages of a plant’s life. There is a reason this innovation has been recognized by the Engineering Excellence Awards. The science behind the “The Enforcer” and Super Spreader combined solves 4 important grower concerns.

- Adjust-A-Wing Reflectors are available in medium and large sizes.
- “Enforcer” Super Spreader available in medium and large.

INTENSITY.
Create broad and even light footprints with Adjust-A-Wings reflectors. Traditional designs are flawed. Closed reflectors result in concentrated light and heat in a smaller area. Our open design allows for coverage of a larger/wider area. Add in “The Enforcer” Super Spreader for a light and heat deflector, and you will have the ability to have lights closer than ever. Increasing the intensity while eliminating hot spots at the same time!

VERSATILITY.
It’s a scientific fact that parabolic curves are the best shape for reflecting light into a uniform pattern. The Adjust-A-Wings reflectors create a wide range of these curves allowing the grower to “dial in” optimum light intensity spreading it across all stages of the plants life. This flexibility now gives you the options you need to deal with the ever changing growth cycle.

ENVIRONMENT.
Heat generated from HID lamps is always working against your goal of maintaining ideal room temperature. The open design offers a compromise. Unlike closed reflectors that trap heat. “The Enforcer” allows hot air to rise. Warm air will dissipate as cooler air flows throughout your room without restriction.

COST.
Adjust-A-Wings line of products are made from highest quality materials. Lightweight and durable, they are designed to provide you with years of diligent service. Without compromising the innovative design and its essential functions, Adjust-A-Wings has released “the Enforcer” a new line of reflectors. This economical choice is now available so growers can use superior technology at an affordable price.
