Premium Organic Soils
Exceptional Coconut Coir

Royal Gold is made in the USA, processed with the utmost care using gratifying cutting edge equipment. Naturally potassium rich coco promotes strong stems and beautiful flowers. Our unique hydration process ensures pH balanced soil. Working with renewable recourses like coco, is important to the environment. We add a compost tea and incorporate biological control that eliminates the change of unwanted soil born bugs. Re-use up to 5x saving you time and money. This premium organic soil will result in higher yields, better flavor, with a greater consistency in the finished product.
